EU type-approval numbers will be added to this index when granted.

How to identify a vehicle

The 17-character Vehicle Identification Number (VIN) is stamped on the right side of the frame and shown on the statutory plate. VINs of vehicles built by Lynx ApS start with **UHN**, followed by the category (L2E or L5E), number of seats, body (C = Cruiser, G = Cargo), check digit, model year, plant code and a six-digit serial number. Vehicles built under the former Carver approvals carry VINs starting with XM6. Please quote the full VIN in every request.

Document index

Section	Content	Status
Identification	Type-approval numbers, variants, VIN ranges	This document
Maintenance schedule	Service intervals and inspection points	In preparation
Service and repair manual	Removal, installation, adjustment, torque values	In preparation
